

## Quality Control Policy

At PB Group, we understand the importance of quality control to ensure that our products meet our customers' expectations and regulatory requirements. We have established the following policy to guide our quality control practices:

**Materials:** We use only high-quality raw materials sourced from reputable suppliers to manufacture our polybags. We inspect all materials upon arrival to ensure they meet our specifications and are free from defects.

**Manufacturing:** Our manufacturing processes are designed to produce polybags that meet or exceed our customers' specifications. We maintain strict control over our production processes to ensure that our products are consistent and free from defects.

**Inspection:** We perform thorough inspections of our polybags at each stage of production, including visual inspections, measurements, and tests for strength, durability, and seal integrity. We also conduct regular spot checks to ensure ongoing quality control.

**Continuous Improvement:** We are committed to continuous improvement and are constantly seeking ways to enhance our quality control processes. We encourage feedback from our customers and employees to identify areas for improvement.

**Regulatory Compliance:** We adhere to all relevant regulations and industry standards to ensure that our polybags are safe and compliant with all applicable laws and regulations.

At PB Group, we are committed to providing our customers with high-quality polybags that meet their requirements and exceed their expectations. Our quality control policy guides our practices to ensure that we deliver consistent, reliable, and safe products to our customers.
